

COOL AIR™ HEAT

ELECTRIC HEATER - SUSPENDED

25 kW

These resistant heaters are suspended above the area being heated. They work great in temporary structures or public spaces where an overhead fixing point is available. A simple, inexpensive general heating product that doesn't take up any floor space.

Features:

- Safe, reliable electric heat suspended out of the way
- Simple thermostat control mounted on unit
- Adjustable louvers allow air flow to be ducted

Applications:

- Temporary Structures
- Warehouses
- Construction Sites
- Film Studios/Sets

Small but powerful, these 25 kW heaters pack a punch. Temporary structures go from cold and damp to warm and comfortable with the help of these units.

These units are great for tents and other structures where floor space needs to be kept clear. Suspended from their own brackets, these units provide heat where it is needed most.

These suspended heaters can also be installed before the roof of the structure is put in place. This allows for easy access and better time management.

HEAT...IN A HURRY

ELECTRIC HEATER - SUSPENDED

25 kW (HES25H23)

HEATING		25 kW	PHYSICAL		25 kW
Medium		Electric Suspended	Controls		Rotary Dial Selector
