RENTALS LTD

WATER COOLED INDUSTRIAL PORTABLE

10 TON TS

This 10 ton is another one of our benchmark units. This workhorse is built to tackle the largest server room applications. The ideal solution for all kinds of short and long term cooling problems. If you have a large cooling problem, this is the solution.

Features:

- Largest capacity unit that fits through a conventional 36' x 84' door
- Completely portable, sets up in minutes
- Requires 208 volt three phase power
- Advanced touchscreen control technology

Applications:

- Computer Room Cooling
- Emergency Cooling
- Supplemental Cooling
- Network Operation Centres

Server room cooling applications are an ideal fit for this unit. Outfitted with hard nylon tires and a low profile plenum, these units slip into any server room.

Require more than 10 tons? It's simple, we'll just keep rolling these babies through the door until we've matched the capacity of your space. When you're done, they simply roll out leaving no evidence that they were ever there. It can't be any simpler than that.

This movie set required a large amount of cooling but site constraints dictated smaller mobile units that could deliver precision cooling to specific areas. These 10 tons exceeded expectations.

REAL COOL. REAL FAST.

WATER COOLED INDUSTRIAL PORTABLE 10 TON TS (WCI10V23TS)

COOLING		PHYSICAL	
Medium	Water	Controls	Thermostat, Push Button, Remote Control, Touch Screen
Capacity	120,000 Btu's	Evaporator Air Flow	4000 CFM
Capacity	10 tons	Supply Air Duct	20"
Capacity	Approx. 4000 Sq. ft.	Condensate Collection	Pumped with Back-up
ELECTRICAL		Water Consumption	7 Gallons per Minute
Voltage	208	Water Connection	3/4" GHT
Phase	Three	Filter Type	Blue Polyflo
Breaker Size	60 Amps	Filter Size	29" x 44"
Current Draw	38 Amps	Caster Type	10" Air-filled
Plug	Cam-Lok	Dimensions - Width	34"
Power Cord Length	2'	Dimensions - Depth	49"
Power Cord Wire Size	#2 AWG Single Conductor	Dimensions - Height	83"
		Dim. - Height w/ Plenum	106"
		Weight	786 lbs

ROLL IN

Heavy duty casters with air-filled tires make locating these units a breeze.

PLUG IN

These units require a connection to a water supply and drain.
