

COOL AIR™ RENTALS LTD

AIR COOLED INDUSTRIAL PORTABLE

5 TON

These 5 ton units are a larger scale version of our popular location cooling units. They are very adaptable and provide plenty of cooling punch.

Features:

- Completely configured for the film industry
- Largest unit that fits into a 1 ton cube van
- Large air-filled tires allow this unit to be rolled over uneven ground
- Requires 208/230 volt single phase power

Applications:

- Special Events - Festivals
- Industrial Plants
- Temporary Structures
- Standby Cooling Applications

Rooftop placement allows for effortless integration with your existing duct system. Remote thermostat ensures that desirable temperatures are maintained.

Even massive container cranes require emergency cooling. The servers that control operation were overheating and shutting down, bringing the unloading of the container ship to a grinding halt. The cooling provided by this portable unit got things moving again.

This full-sized house was built as a set piece for a feature film. Scenes were shot inside as well as outside the building. With the help of one of these units, the cast and crew did not have to suffer under the heat produced by the hot movie lights.

REAL COOL. REAL FAST.

AIR COOLED INDUSTRIAL PORTABLE 5 TON (ACI5H21)

COOLING		PHYSICAL	
Medium	Air	Controls	Push Button
Capacity	60,000 Btu's	Evaporator Air Flow	2000 CFM
