

# COOL AIR™ HEAT

## INDUSTRIAL ELECTRIC HEATING GROUP

6 - 60 kW

Our diverse industrial electric heating lineup ensures that Cool Air will have the right unit for you. We have a large selection of safe, electric heaters that provide the perfect amount of heating for any situation. Hazardous exhaust is non-existent in our electric heaters meaning your employees and/or clients are kept safe.

### Features:

- Completely portable, sets up in minutes
- Dry, safe and quiet
- Warm air is ductable on most units
- Multiple voltage and kW strengths available

### Applications:

- Office Spaces
- Construction Sites
- Industrial Plants
- Film Sets/Studios

Heating temporary structures has never been easier. By allowing the unit to safely sit inside the space, a more efficient heating process is obtained. The air inside the tent can pass through the heater more than once resulting in a safe and more comfortable environment.

When the heating system in this office broke down, these units provided immediate dry heat at a sound level that did not disrupt the work in the office.

These electric furnaces are ideal for enclosed spaces where the unit must sit inside the space being heated. Safe, dry heat means that there is zero concern of toxic fumes.

**HEAT...IN A HURRY**
