

COOL AIR™ HEAT

ELECTRIC HEATER - RADIANT

14 kW

Radiant heat is a great option to go with when you have large open areas where conventional heat would be dissipated or lost. These units heat your body rather than the air, leaving people warm and toasty when the air temperature remains relatively unchanged.

Features:

- Silent operation ensures that these units do not interfere with conversation
- Support bracket can be attached to scaffolding or hung from a wall or ceiling
- Cam-Lok plugs allow for easy film or event industry hook-up

Applications:

- Restaurants
- Tents
- Spot Heating

Heating outdoor seating areas is what these units are all about. By bathing patrons in comfortable radiated heat, they were able to enjoy their meal outside in the middle of winter.

Working in large open spaces often means an uncomfortable environment. Rolling in this 14 kW radiant heater on our custom designed cart quickly heats things up and increases productivity.

These powerful radiant panels are great for heating open warehouse spaces. Radiant heat ensures that the energy from the units is heating the people in the space and not the air.

HEAT...IN A HURRY

ELECTRIC HEATER - RADIANT

14 kW (HER14H23)

HEATING		14 kW	PHYSICAL		14 kW	
Medium		Electric Radiant	Controls		High/Low/Off	
Capacity		47,768 BTU			Toggle Switch	
Capacity		14 kW	Dimensions - Width		65"	165 cm
			Dimensions - Depth		10"	26 cm
			Dimensions - Height		35"	89 cm
			Weight		178 lbs	81 kg
ELECTRICAL						
Voltage		208				
Phase		Three
