

COOL AIR™ HEAT

INDUSTRIAL HEATING GROUP

19 - 185 kW

Our diverse industrial heating lineup ensures that Cool Air will have the right unit for you. We have a large selection of safe, electric heaters as well as indirect gas-fired equipment. Hazardous exhaust is non-existent in our electric heaters and is safely vented separately from the warm air in our gas-fired units.

Features:

- Completely portable, sets up in minutes
- Dry, safe and quiet
- Warm air is ductable
- Multiple voltage and kW strengths available

Applications:

- Spot Heating
- Film Sets/Studios
- Construction Sites
- Industrial Plants

These electric furnaces are ideal for enclosed spaces where the unit must sit inside the space being heated. Safe, dry heat means that there is zero concern of toxic fumes.

When the heating system in this office broke down, these units provided immediate dry heat at a sound level that did not disrupt the work in the office.

By ducting the warm air inside, direct heat can be provided where it is needed most. These units are weatherproof and designed to sit outside where combustion exhaust can vent safely away.
