

COOL AIR™ RENTALS LTD

VENTILATION GROUP

2050 - 5100 CFM

These ventilation units are great for any application. Powerful & convenient, they are an ideal alternative when you have budgetary or power consumption concerns. When you need to move large volumes of air and only have standard outlets available, these are the units to turn to.

Features:

- High ventilation power in a small package
- Most use convenient 115 volt power
- Versatile and durable units that can be used practically anywhere.

Applications:

- Server Room Cooling
- Manufacturing Areas
- Retail Stores
- Warehouses

This retail store was suffering when the building system shut down. This Force 9 fan was installed to keep the air moving and people feeling refreshed.

Electrical and machining work often creates unwanted heat and fumes. This ductable Black Max fan helped to expel this air by delivering it straight towards the building exhaust system.

These Force 9 and Vortex Axial fans worked together to keep air circulating down these server aisles. Without the help of Cool Air, this room would have shut down from over-heating and phone and internet service would be interrupted for thousands of customers.

REAL COOL. REAL FAST.

ROLL IN

Don't let the compact size fool you. These units move serious volumes of air. A large handle makes for easy placement.

PLUG IN

Most of these fans run off convenient 115 volt power. Plug them into any standard outlet.

TURN ON

With conveniently located controls, some equipped with 2-3 speed settings, these fans are very versatile.

We also rent industrial and portable air conditioning units, fans, and industrial strength heating units. Visit www.cool-air.com for our full line of rental equipment.
