

WHY COOL AIR

Locally owned and operated, Cool Air Rentals has been providing consistent, reliable, and efficient solutions to Vancouver's film industry since 1995. We are a founding corporate member of the Motion Picture Production Industry Association (MPPIA) and a member of its Executive Committee. Cool Air appreciates the trust the industry has placed in us to provide solutions, and we work hard to contribute to the overall success of our local film industry.

OUR EQUIPMENT

Supported by our in-house team of technicians, our extensive experience, and industry guidance, we can provide purpose-built equipment specific to individual productions.

STAGE COOLING

Our industrial-sized cooling units are perfectly suited to handle the high temperatures created by everything from studio lights to studio execs!

STAGE HEATING

A large cavernous sound stage can be challenging to manage the right temperature level. Portable electric furnace and radiant electric panels give you complete flexibility to focus heat energy in a specific area.

LOCATION COOLING

Call on Cool Air when your location demands immediate cooling. Flexible equipment coupled with extensive experience makes the choice simple. Air filled tires make mobility easy, and our units set up in seconds.

LOCATION HEATING

When your situation calls for safe, reliable heat, our industrial strength electric furnaces and indirect gas-fired heaters are the answer. They easily roll into place, plug in, and turn on! Instant heat, problem solved.

...MORE SOLUTIONS

TENT COOLING

Hot and humid conditions are not pleasant at the best of times. Whether they exist inside a temporary structure where your cast and crew go for relief from the hot summer sun or an overheated sound stage, things can get ugly.

TENT HEATING

We offer a variety of tent heating options. From suspended radiant panels to ductable electric furnaces to gas-fired heaters, we have you covered.

SPECIALTY COOLING

From prosthetics to dimmer shacks... no matter what the situation or the logistics, we have the equipment and know-how to handle any cooling dilemma.

SPECIALTY HEATING

Compact, powerful and effective, we offer customized solutions to your temperature control problems.

SET PROP RENTALS

Our funky collection of fans, air conditioners and heaters is great for that set decoration project. We've removed all of the heavy components so these light weight units install in seconds.
