

COOL AIR™ HEAT

ELECTRIC FURNACE - HORIZONTAL

6 kW & 9 kW

These portable furnaces are ideal for smaller construction projects or individual offices. They can easily be plugged into a dryer or range outlet; we'll even supply a custom contractors junction box allowing for maximum versatility.

Features:

- Completely portable, sets up in minutes
- Dry, safe and quiet
- Eliminates over loaded standard outlets and the frustration of tripped breakers
- Adapted to plug into a dryer or range outlet

Applications:

- Office Heating
- Construction
- Film Locations
- Special Events - Festivals

This 6 kW heater was used to warm up this work shop. With a simple connection to a dryer plug this unit delivered the equivalent amount of heat produced by four standard plug in units.

When the heater in this building was being replaced our 9 kW portable heater was used to maintain optimal temperatures in the work space. An unused range plug provided the power required and made for a simple and effective solution.

When the dedicated heating unit in this staff lunch room could not keep up with winter conditions this 9 kW unit stepped up the temperature. Staff benefited by being able to function at their fullest and management avoided an unplanned winter upgrade.

HEAT...IN A HURRY

FURNACE 6 kW (HEF6H21) & 9 kW (HEF9H21)

HEATING	HEF6H21		HEF9H21
