

COOL AIR™

RENTALS LTD

WATER COOLED PREMIUM PORTABLE

5 TON

This 5 ton is the largest water cooled portable in its class. When you need large scale office cooling, this is the unit to turn to. Standing alone or hooked to a perforated duct system, this is the ideal office cooling solution.

Features:

- Powerful and reliable
- Hooks up easily to water source and drain
- Cold supply air can be ducted away or simply delivered off front of unit
- Requires 208 volt 3 phase power
- Auto restart after power failure

Applications:

- Office Area Cooling
- Supplemental Cooling
- Meeting/Conference Room Cooling
- Classrooms

This 5 ton unit easily slipped through the door of this server room. The cooling capacity provided by Cool Air allowed the business to continue operations without interruption.

By placing this unit on the intake side of the servers, cool air was delivered directly into the electrical components for maximum cooling effectiveness.

Melted chocolate bars, frayed tempers, and annoyed customers are just a few of the things that happen when temperatures escalate. Without the use of this 5 ton unit, this convenience store would have lost much of its stock due to the high temperatures.

REAL COOL. REAL FAST.

WATER COOLED PREMIUM PORTABLE 5 TON (WCPP5V23)
