

COOL AIR™ RENTALS LTD

DRYING GROUP

227 - 4450 CFM

Our drying group can handle your most humid problems. Whether water needs to be removed from the air or an unfortunate leak or flood needs to be taken care of, our machines and expertise can tackle any situation.

Features:

- Uses convenient 115 volt power.
- Strong drying capabilities with minimal noise.
- Lightweight and portable for easy placement and movement.

Applications:

- Carpet Drying
- Medical/Dental Offices
- Construction Sites
- Electrical Vaults

This Turbo Dryer is great for handling spot drying needs. Face it in the direction of the problem area and the unit will do the rest. This unit also works well for drying walls, under cabinets, and other closed, less ventilated areas.

Construction of this gymnasium was kept on schedule thanks to these dehumidifiers. A controlled environment is what Cool Air is all about.

This dehumidifier was installed to control moisture in a sensitive area of this ship. Without the use of this unit, normal operation and maintenance would have been adversely affected.

REAL COOL. REAL FAST.
