DESICCANT DEHUMIDIFIER - 300 SCFM

DED300

For large scale flooding mishaps or humidity management, these dehumidifier units are powerful enough to handle the job yet mobile enough to easily roll in wherever you need it to go.

Features:

- Strong drying capability
- Portable for easy placement and movement.
- Requires 208 volt three phase power

Applications:

- Film Studios (Pool Scenes)
- Construction Sites
- Electrical Vaults

After a heavy rain flooded this warehouse and everything that was stored inside, we utilized our dehumidifier units to dry their equipment out and get them back on track.

Whenever a film crew is shooting an underwater scene one of the major concerns is managing humidity levels in the studio. The large tank of hot water is constantly evaporating and the excess humidity has the potential to condense on the structure and start dripping... everywhere. A solid humidity management plan is a must.

Emergencies aren't the only cases where dehumidifiers can come in handy; here, a unit is used to ensure the humidity is suitable for a major painting job.

REAL COOL. REAL FAST.

DESICCANT DEHUMIDIFIER

300 SCFM (DED300)

DEHUMIDIFICATION		PHYSICAL	
Capacity	300 SCFM	Controls	Local ON/OFF, Remote Dehumidistat
Capacity - Moisture removal at 75°F 50% RH	7.9 lbs/hr	Process Air Blower	300 CFM
ELECTRICAL		Process Air Duct	8" dia
Voltage	208	Process Air Inlet	20" x 6"
Phase	Three	Re-Activation Air Duct	6"
