

COOL AIR™ RENTALS LTD

TRANSFORMER

10 kVA

Packaged portable transformers allow you to step down from 600 volt to standard 208 volt power. They simply roll up to our equipment and plug in. Once the transformer is energized, throw the disconnect switch and you're ready to go.

Features:

- Flat-free rubber tires
- Rugged welded aluminum frame
- 15 amp disconnect on load side
- Twist-lock cord ends on line side

Applications:

- Hub Sites
- HVAC Retrofits and System Upgrades
- Electrical Vaults
- Industrial Plants
- Construction Sites

We often use transformers with our larger air conditioners and chillers but for smaller machines like this 1.5 ton unit we need a small transformer to match. The 10 kVA is the perfect fit!

This building needed temporary heat during renovations; 208 volt power wasn't available in this area but 600 volt power was. Our portable transformer was the simplest solution.

Even in a sensitive environment like this complex care residential facility, our small transformer can be necessary to provide the residents with the cooling they need to stay comfortable.

REAL COOL. REAL FAST.

TRANSFORMER 10 - 10kVA (EDT010H)

ELECTRICAL

Kilovolt Amp Rating	10
Voltage - Primary	600
Voltage - Secondary	208
Phase	3
