

COOL AIR™ RENTALS LTD

TRANSFORMER - AUTO

45 kVA

Packaged portable transformers allow you to step down from 600 or 480 volt power to our standard 208 volts. They simply roll up to our equipment and plug in. Once power is introduced to the disconnect, you're ready to go.

Features:

- Flat-free tires
- Rugged welded aluminum frame
- 60 amp disconnect on load side
- Cam-Lok cord ends on line side

Applications:

- Hub Sites
- HVAC Retrofits and System Upgrades
- Electrical Vaults
- Industrial Plants

Widely adaptable, housed in a welded aluminum chassis, and equipped with flat-free rubber tires these transformers are built to go anywhere.

This large woodworking shop needed additional heating. Only 480 volt power was available and the electric furnace requires 208 volts. Problem solved with our portable transformer.

Interior or exterior applications are easily handled by our waterproof units. They simply roll right next to our equipment and plug in.

REAL COOL. REAL FAST.
