

COOL AIR™ RENTALS LTD

TRANSFORMER - AUTO

75 kVA

These portable step down transformers simply roll into place. The matching cord ends allow them to be daisy-chained with our equipment. Once power is connected to these transformers, our cooling or heating equipment is ready to roll.

Features:

- Flat-free tires
- Rugged welded aluminum frame
- 100 amp disconnect on load side
- Cam-Lok cord ends on line side

Applications:

- Hub Sites
- HVAC Retrofits and System Upgrades
- Electrical Vaults
- Industrial Plants

When this electrical vault overheated, the easiest way to power our cooling unit was by utilizing one of our roll-in transformers.

This industrial manufacturing facility only had 600 volt power available. No problem for our portable transformer. Hook up power and away you go.

This large telecom space required our auto transformer to facilitate energizing this 25 ton air conditioning unit.

REAL COOL. REAL FAST.
