

# COOL AIR™ RENTALS LTD

## TRANSFORMER

## 150 and 300 kVA

Packaged portable transformers allow you to step down from 600 volt power to 480 volts for our 60 or 100 ton chiller units. They simply roll up to our equipment and plug in. Once power is hooked up, you're ready to go.

### Features:

- Flat-free tires
- Rugged welded aluminum frame
- Cam-Lok inlets and outlets for hook-up

### Applications:

- HVAC Retrofits and System Upgrades
- Film Studios
- Electrical Vaults
- Industrial Plants

When this building's chiller required maintenance, Cool Air provided a temporary chiller. With only 600 volt power available we provided a packaged portable transformer to step down the voltage and energize the chiller.

This transformer was used at a film set to energize one of our 60-ton chillers. Set cooling is critical during summer months to keep cast and crew cool despite all of the lights and equipment.

With a welded aluminum chassis and flat-free rubber tires, these waterproof transformers are ready to go anywhere; inside or out.

REAL COOL. REAL FAST.

## TRANSFORMER - 150 and 300 kVA (EDT150H/EDT300H)

ELECTRICAL	TRANSFORMER 150	TRANSFORMER 300
