

# AIR COOLED INDUSTRIAL CHILLER 30 Ton 208 Volt

This relatively compact chiller is a great solution when you have a smaller heat or process load that you need dealt with. Match it up with our 30 ton air handler and you have a very efficient closed loop. Even standing alone and tackling a heat load that was previously a problem, this star performer really shines. When tricky building conditions make cooling difficult, this is one of the most effective options to get the cooling you need.

#### Features:

- Internal pump
- By-pass feature for external pump connection
- Variable load 7.5 to 30 tons
- Positioning is simple; roll, forklift or hoist into place
- Requires 208 volt three phase power

#### Applications:

- Healthcare
- Manufacturing
- Film Studios
- Large Commercial Buildings

When temperatures inside this manufacturing facility began to affect productivity levels, this 30 ton chiller and our matching 30 ton air handler were brought in to restore temperatures inside the plant to acceptable levels. Once the conditions improved, so did morale and output. When fall weather brought cooler outdoor temperatures, we removed our gear.

During the middle of a winter season, this unit was used as part of a complex system to quickly cool down batches of soup to a temperature safe enough to package. Without our chiller, the factory would have needed to wait until the soup cooled naturally; significantly less efficient.

This 30 ton chiller was located outside a film stage. Relatively small and compact, it was quiet enough to run when they were recording sound. A closed loop of hose connected the chiller to one of our air-handling units inside. Flexible ducting easily directed the conditioned air to wherever it was needed.

## REAL COOL. REAL FAST.

AIR COOLED INDUSTRIAL C	CHILLER - 30 Ton (ACC030)
-------------------------	---------------------------

COOLING		OPERATIONAL LIMITS	MIN MAX	
Capacity	360000	Leaving Water Temp F	40	70
Refrigerant Circuits	1	Leaving Water Temp C	4.4	21.1
Ambient Operating Range	0 to 115 F -17.8 to +46.1 C	Return Water Temp F	40	70
Chilled Water Setpoint	45 to 55 F +7.2 to +12.8 C	Return Water Temp C	4.4	21.1
		Leaving Glycol Temp F	10	70
ELECTRICAL		Leaving Glycol Temp C	-12.2	21.1
		Return Glycol Temp F	10	70
Voltage	208	Return Glycol Temp C	-12.2	21.1
Phase	Three	Voltage 208/3/60	190	230
Breaker Size	175	Air on Condenser F	0	125
Current Draw RLA	108	Air on Condenser C	-17	51.7
Minimum Circuit MCA	Min 135 - Max 150	Evaporator Flow GPM US	34	150
Plug	Series 16 Cam-Lok inlets	Evaporator Flow L/s	2.2	9.5
		Freeze Protection	Max-20 F or -28 C	
		PHYSICAL		
EVAPORATOR		Model	YCAL0033	
	2" Camlok from 2" Gruvlok	Controls	Millennium Control Ctr.	
		Dimensions- Width	50″	127cm
Max. Water Side Pressure	150 PSI	Dimensions- Depth	133″	338cm
Evaporator Volume	3.2	Dimensions- Height	57″	144cm
		Width w/ Casters	52″	131cm
		Depth w/ Casters	135″	342cm
		Height w/ Casters	63''	161cm
		Weight	3160lbs	1434kg
		Forklift Pockets	4" x 8"	100 x 203mm

Heavy duty casters and good mobility make locating these units a breeze. Wheel assemblies are removable for forklift or crane placement.

Convenient Cam-Lok connections make it easy to connect to 208 volt power and get the unit running fast.

## TURN ON

Easy to follow touch screen controls allow you to tailor make how you operate this unit. Operating conditions are continuously displayed.

We also rent portable air conditioning units, fans, air movers, and industrial strength heating units. Visit www.cool-air.com for our full line of rental equipment.
