

COOL AIR™ RENTALS LTD

AIR COOLED INDUSTRIAL WITH ELECTRIC HEAT

3 Ton

This purpose built emergency response unit is the epitome of complete mobilization. Roll it, forklift it, or crane it. This unit is built to military standards; it even has helicopter hook points. Everything from the duct to the electrical cable and controls are self-contained within the unit itself. Ideally suited to provide climate control solutions for temporary structures. This baby is built to perform.

Features:

- Electric Elements allow this unit to heat as well as cool.
- Easy to understand controls ensure fool-proof field operation.
- Weather Proof Military Grade Construction.
- Requires 208 volt three phase power.

Applications:

- Emergency Cooling & Heating
- Temporary Structures
- Disaster Relief

This community hall was hot and stuffy and that was before the people arrived for the meeting. This unit got the temperature level comfortable and held it that way for the duration of the event.

When shooting at this residential home the production company required a mobile unit capable of heating in the morning and cooling in the afternoon. This rugged machine fit the request perfectly.

A quick response was required to keep the summer heat from ruining the plants in this botanical facility. Tying into the building ventilation system allowed for even distribution of the conditioned air. We located the unit on the buildings rooftop and kept any inconvenience to the public well out of the way.

REAL COOL. REAL FAST.

AIR COOLED INDUSTRIAL WITH ELECTRIC HEAT - 3 Ton (ACI3H23ER)

COOLING		PHYSICAL	
Medium	Air	Controls	Local or Wired Remote Thermostat
Capacity	36000 BTU 3 Ton	Evaporator Air Flow	1200 cfm
