

WHY COOL AIR

Cool Air Rentals has been providing consistent, reliable, and efficient solutions for mechanical contractors since 1995. Supported by our in-house technicians and extensive experience, our team will design, deliver, install, and commission our custom systems with professionalism and accuracy.

Our specially designed equipment can support emergency situations or planned shutdowns. Providing seamless service while permanent base building equipment is repaired or replaced.

Contact us for further information, or to book a site visit with our team.

OUR COOLING EQUIPMENT

Custom built in house, our gear is carefully crafted to simply roll in, plug in, turn on. Whether you are looking for industrial air conditioners, portables, chillers, air handlers, pumps, or dehumidifiers, we have it all in any size required and can absolutely get it to you quickly.

COOLING CASE STUDIES

WATER COOLED INDUSTRIAL

A server room required a 15-ton temporary cooling system while a new unit was being installed. Our unit successfully held the space at the set point continuously for the 8-week duration of the project.

AIR COOLED CHILLER

While permanent chiller units were being mounted on a highrise rooftop, we installed 60-ton chillers to provide temporary cooling. The hoses and the power feed were run up the outside of the building and then tied into its chilled water loop.

AIR COOLED PORTABLE

The cooling system servicing this lab was being upgraded; we installed this temporary unit after hours, and when the medical team returned in the morning, temperatures inside the space were back to normal.

OUR HEATING EQUIPMENT

Cool Air Rentals can provide heating to a commercial retail unit, lab, or an entire building promptly and effectively. Our equipment is easily transportable and will be chosen specifically based on the exact need.

HEATING CASE STUDIES

HYDRONIC TIE-IN

The boiler for the Aquarium Amazon Jungle exhibit needed replacement. We supplied this dual 1.2 MM BTU hydronic heating package to heat the exhibit's air and water for ten weeks while the permanent system was being replaced.

ELECTRIC

This clothing store lost its heating during the coldest time of the year – within a few hours, their electrical contractor had provided a simple electrical tie-in, and our unit shortly after restored the temperature to acceptable levels.

INDIRECT FIRED

This college needed to service its boiler and air handlers during a cold snap which risked the prospect of frozen pipes and chilly classroom. We were able to keep class in session thanks to the fast-acting mechanical team, our experienced technicians, and installers.
