

WHY COOL AIR

Excess cold or heat can turn your carefully planned event into a very uncomfortable ordeal for both you and your clients. With our proven expertise and vast inventory of cooling, heating, and ventilation equipment, Cool Air Rentals can design the ideal equipment package for your special event.

Let us provide you with the best solution possible, while balancing your competing priorities of expectations, budget, space, and power limitations.

OUR COOLING EQUIPMENT

Custom built in house, our gear is carefully crafted to simply roll in, plug in, turn on. Whether you are looking for industrial air conditioners, portables, chillers, air handlers, pumps, or dehumidifiers, we have it all in any size required and can absolutely get it to you quickly.

COOLING CASE STUDIES

GLASS WALLED STRUCTURE

Hermes set up this large temporary structure in downtown Vancouver to showcase their products and craftsmanship. These units heated and cooled the structure for four weeks, through diffusers we installed in the floor.

VIP TENT

A major part of the Canadian Open Golf Championship is the spectator venues and VIP suites. This glass-walled structure demanded temporary cooling to keep sponsors and clients comfortable during the heat-laden days of summer.

ARTIST HANG-OUT

Artist World at Montreal's Osheaga Festival is where the artists hang out before and after their performances. A conditioned tent structure for them to retreat to and recover in is mandatory during August's hot and humid days. This cooling duo of a 10- and 20-ton units ensured the talent stayed happy and ready to entertain.

OUR HEATING EQUIPMENT

Cool Air Rentals can provide heating to any special event venue promptly and effectively. Our equipment is easily transportable and will be chosen specifically based on the exact need.

HEATING CASE STUDIES

WINTER FESTIVAL

This winter event deployed these portable hydronic boilers to heat water that was then circulated through fan coils to ultimately heat the air inside the food tents. This application was quiet, efficient and economical.

MILLION DOLLAR PIANO

This large art presentation was held inside this temporary structure for five months. Early on, the structure was cooled to achieve a comfortable space for guests. As the sun gave way to cloud and rain, the equipment was switched over to heating because a temperature and humidity balance was required to ensure that the delicate piano wasn't adversely affected.

FUNDRAISER DINNER

This majestic temporary structure was erected for an evening fundraiser dinner. All of the planning, building and decoration would have been wasted if the guests had been uncomfortable. Our wealth of experience and effective and reliable equipment meant this event came off without a hitch.
