

# HYDRONIC HEATER

400,000 BTU

This compact hydronic heater is perfect for mediumsized structures, providing quick heat when needed. Its low-pressure operation and atmospheric venting eliminate the need for special boiler certification or supervision.

#### Features:

- Tie directly into a building's heat system, or add fan coils for heat distribution.
- Positioning is simple roll, forklift or hoist into place.
- Weatherproof construction.
- Requires readily available 115-volt single phase power.

### Applications:

- HVAC retrofits and system upgrades
- Industrial plants
- Emergency heat

The repair of a broken hydronic heating system quickly revealed an issue far larger, and the need for a completely new unit. While repairs were underway, we supplied a custom solution to keep the building and its residents warm.

A dedicated unit at this animal shelter went offline during a cold snap, putting the furry creatures at risk. We were there "quick as a bunny" ensuring all were kept safe until the existing equipment was functioning once again.

A winter craft fair moved into this tensioned fabric building requiring additional heat to ensure vendor and customer comfort. We added two hydronic heaters outside the building, supplying fan coils located inside creating an enjoyable experience for all.

## **HEAT**... IN A HURRY

# HYDRONIC HEATER - GAS FIRED **400K BTU** (HGB400H11)

HEATING		
Controls	All pressures & temps	
Capacity	400,000 BTU/hr	
Stages	Single	
Ambient Op. Range °F	130 °F to 200 °F	
Ambient Op. Range °C	49 °C to 93 °C	
ELECTRICAL		
Voltage	115	
Phase	Single	
Breaker Size	15	
Amp Draw	11.4	
Plug	5-15P

Forklift Pockets	4"x8" (31"spread)		
Lift Design	Engineered 1" EI/ES		
Crane	Shop drawing available upon request		

Housed in a galvanized steel frame, these units can be moved into position by forklift or crane, or rolled, with the caster assemblies in place.

11/4" Camlock hose fittings carry the glycol/water mix to your buildings dedicated loop or to our portable fan coils or heat exchanger.

Toggle switches and indicator lights step you through the start up and operational phases of this hydronic heater to ensure uninterrupted service.

We also rent industrial and portable air conditioning units, fans, and air movers. Visit www.cool-air.com for our full line of rental equipment.
